

Executive Summary

Verdict: Confirmed. Observations from raid members that BigWigs timers were "a bit off" during last night's Blackwing Lair raid are fully substantiated by deep combat log forensics.

While several stationary dragon encounters (Firemaw, Ebonroc, Flamegor, Chromaggus) matched BigWigs timers within $\pm 0.05s$, **two critical encounters exhibited major discrepancies** affecting tank survivability and warrior stance dancing.

Raid & Log Telemetry

- Dataset Source:** Chronicle / Capybara Protobuf Stream + Local Client Log
- Log Duration:** 1h 20m (54 encounters parsed)
- Event Volume:** 113,827 damage events, 120,121 aura events
- Guild:** <Zug Zug> | **Recorder:** Banthracis
- Client / Server:** Turtle WoW 1.18.1 (1.12.1 + SuperWoW + NamPower)

Key Discrepancies (Why BigWigs Felt "Off")

1. Broodlord Lashlayer — First Mortal Strike (Severe Discrepancy: -15.4s)

CRITICAL DISCREPANCY

The Code Issue: In `Raids/BWL/Broodlord.lua:51`, the developer hardcoded `msFirstCd = 48` with an inline comment: `--first supposed to be 25, saw 48!?`

Actual Log Data: Broodlord engaged at `18:24:08.064`. The first Mortal Strike landed at **T + 32.61s** (`18:24:40.674`), followed by the second MS **27.90s later** (`T + 60.51s`).

Raid Impact: BigWigs still showed **15.4 seconds remaining** on the first MS timer when the tank took the hit. Healers expecting another 15 seconds to top the tank before the 50% healing reduction debuff landed were caught completely off-guard.

2. Nefarian — Bellowing Roar (AoE Fear) & Warrior Alert (3–5s Desync)

TACTICAL DESYNC

The Code Issue: In `Raids/BWL/Nefarian.lua:217`, BigWigs sets `fearCd = 23.5s` (+ 1.5s cast = **25.0s**). It prompts Warriors with an icon and horn to stance-dance into Berserker Stance at **21.5s** (`timer.fearCast + timer.fearCd - 3.5`).

Actual Log Data: Across both the wipe and the kill, Fear intervals were consistently **26 to 30 seconds**:

- Kill Fight Intervals:** `25.99s`, `29.27s`, `28.25s`, `29.80s`, `29.41s`, `30.03s` (Average: **28.79s**)
- Wipe Fight Intervals:** `25.19s`, `26.85s`, `27.86s`, `27.62s`, `30.01s` (Average: **27.51s**)

Raid Impact: The Fear bar expired 3.5 to 5.0 seconds too early on nearly every cycle. Because *Berserker Rage* only lasts 10 seconds, warriors who stance-danced on the BigWigs audio alert (at 21.5s) saw their immunity expire right as the ~29–30s Fear actually landed!

3. Ezzel Darkbrewer (Turtle WoW Custom Boss — Completely Missing)

MODULE MISSING

Between Firemaw and Ebonroc, the raid engaged the Turtle WoW custom encounter **Ezzel Darkbrewer** (18:46:21 – 18:48:43, duration 2m 22s).

BigWigs currently contains **no module** for Ezzel Darkbrewer in `Raids/BWL/`. The addon was completely silent throughout the encounter, producing zero timer bars or warnings for Acid Bomb (1.3s waves), Collide, or Falling Debris.

Boss	Ability / Mechanic	BigWigs Configured Timer	Actual In-Log Intervals	Verdict
Razorgore	Fireball Volley (P2)	{14s, 16.5s} + 2s cast	16.12s (P2)	ACCURATE
Razorgore	Conflagration (P2)	{15s, 19s}	21.67s	MINOR DRIFT
Vaelastrasz	Burning Adrenaline	15.0s fixed	15.03s, 14.97s, 15.11s (Avg: 15.04s)	SPOT-ON
Vaelastrasz	Fire Nova	{2s, 4s}	2.0s base (delays to 3.9s–4.8s during casts)	SPOT-ON
Vaelastrasz	Flame Breath (Debuff)	{5s, 10s}	5.25s, 6.91s, 5.90s, 9.38s (Avg: 7.00s)	ACCURATE
Broodlord	Mortal Strike (1st)	48.0s (Hardcoded)	32.61s from engage (-15.4s discrepancy)	SEVERELY OFF
Broodlord	Mortal Strike (Next)	{20s, 30s}	27.90s	ACCURATE
Broodlord	Blast Wave	{20s, 35s}	27.75s	ACCURATE
Broodlord	Knock Away	{12s, 25s}	12.15s, 19.09s	ACCURATE
Firemaw	Wing Buffet	30.0s (29s + 1s cast)	30.04s, 30.00s	SPOT-ON
Firemaw	Shadow Flame	16.0s (14s + 2s cast)	16.01s, 16.05s, 16.01s, 16.03s, 16.01s	EXACT (±0.05S)
Firemaw	Flame Buffet	{1.9s, 4.9s}	1.86s – 3.48s (Avg: 2.58s)	SPOT-ON
Ezzel Darkbrewer	All Mechanics	None (No module exists)	Acid Bomb (1.3s waves), Collide (10s–33s)	MISSING MODULE
Ebonroc	Wing Buffet	30.0s	30.05s	SPOT-ON
Ebonroc	Shadow Flame	16.0s	16.05s, 16.17s, 15.86s	SPOT-ON
Ebonroc	Shadow of Ebonroc	8.0s	8.06s, 7.95s, 8.11s, 8.05s, 7.96s, 8.03s	EXACT (8.0S)
Flamegor	Wing Buffet	30.0s	30.00s	EXACT

Flamegor	Frenzy	10.0s	10.02s, 11.03s, 10.00s, 10.05s, 10.04s	EXACT (10.0S)
Chromaggus	Time Lapse Breath	60.0s	59.89s, 59.96s, 60.07s (Avg: 59.97s)	EXACT
Chromaggus	Frost Burn Breath	60.0s	59.95s, 60.01s (Avg: 59.98s)	EXACT
Chromaggus	Alternating Breath Cycle	30.0s	29.61s, 59.48s, 89.50s, 119.43s...	EXACT (30.0S)
Chromaggus	Frenzy	{14.8s, 17.0s}	14.94s – 17.05s (Avg: 15.17s)	SPOT-ON
Nefarian	Bellowing Roar (Fear)	25.0s (23.5s + 1.5s cast)	28.25s – 30.03s (Kill avg: 28.79s)	3–5S DESYNC
Nefarian	Shadow Flame	{18.5s, 25.0s}	19.81s – 24.57s (Avg: 22.39s)	ACCURATE
Nefarian	Veil of Shadow (Curse)	{10s, 15s}	10.83s – 14.35s (Avg: 12.56s)	SPOT-ON
Nefarian	Phase 1 Transition	44 Add Kills	Nefarian landed at T + 130s (engaged at 136s)	ACCURATE

Actionable Recommendations & Code Patches

Direct Lua Addon Modifications to Align BigWigs with Server Behavior

Target Files: Raids/BWL/Broodlord.lua ,
Nefarian.lua

1. Fix Broodlord Lashlayer First Mortal Strike (Raids/BWL/Broodlord.lua)

The initial Mortal Strike timer currently uses 48 seconds, which causes BigWigs to show a 15.4s delay when the strike hits at ~32.6s. Change `msFirstCd` to 30 seconds or an interval:

```
-- File: Raids/BWL/Broodlord.lua
local timer = {
-   msFirstCd = 48, --first supposed to be 25, saw 48!?
+   msFirstCd = 30, -- Observed at 32.61s in 2026-09-04 log (was 15.4s late)
    msCd = 20,
    msSoon = 10,
    msDur = 5,
    ...
};
```

2. Calibrate Nefarian Fear Cycle & Stance Dance Alert (Raids/BWL/Nefarian.lua)

Nefarian's Bellowing Roar cooldown on Turtle WoW averages 28.8s (observed range 26.0s to 30.0s). The 25.0s timer bar expires prematurely, and the 21.5s Warrior alert causes 10-second Berserker Rage to drop before Fear hits.

```
-- File: Raids/BWL/Nefarian.lua
local timer = {
    ...
-   fearFirstCd = 25, --saw 26.03
-   fearCd = 23.5, --show Berserker @ timer.fearCd - 3.5
-   fearSoon = 5,
+   fearFirstCd = 26.5, -- First fear observed at 26.0s in 2026-09-04 log
+   fearCd = 26.5,      -- Fear interval observed at 28.8s average (range 26-30s)
+   fearSoon = 3.5,
    fearCast = 1.5,
};
```

3. Create Dedicated Module for Ezzel Darkbrewer (Raids/BWL/Ezzel.lua)

Ezzel Darkbrewer is an active custom boss in Blackwing Lair on Turtle WoW. To provide full boss mod support:

- Register module: `BigWigs:ModuleDeclaration("Ezzel Darkbrewer", "Blackwing Lair")`
- Add timers for **Acid Bomb** waves (~1.3s frequency bursts) and **Collide** (range 10.2s to 33.8s)
- Add alerts for **Falling Debris** and **Pillar Breaker**
- Register `Ezzel.lua` inside `BigWigs.toc` under the BWL section
