

BigWigs 30141: Nefarian Class Call Fixes & Raid Guidance

Urgent operational briefing regarding Nefarian encounter mechanics, dual class calls, and raid leader procedures.

ADDON VERSION	COMMIT REFERENCE	INCIDENT ORIGIN	ENCOUNTER AREA
30141 (Fork: Pepo)	3e1a711 (Master)	Pysanka (Priest Healer Feedback)	Blackwing Lair — Nefarian

1. Incident Report & Root Cause Analysis

The Problem in Previous Raid (Why Pysanka & Healers Alerted Us):

During the September 4 raid, healers and raiders experienced **complete silence** during Nefarian class calls: zero audio alerts ("Beware"), zero on-screen warning signs, zero raid chat messages, and zero timer bars.

In commit `8ecaa3a`, support for Turtle WoW 1.18.1 dual class calls was introduced using two sequential sync channels (`classCallA` and `classCallB`). However, the handler for `classCallA` was programmed only to record `classA = rest` and **deferred all alerts until `classCallB` arrived**.

Encounter Scenario	Flawed 30141 Behavior (Prior)	Fixed 30141 Behavior (Commit 3e1a711)
Single Class Call (e.g., Priests alone @ 22:22:13, Shamans alone @ 22:21:16)	SILENT FAILURE <code>classCallB</code> never arrives. Addon produces zero sound, zero warning sign, zero timer bar. Healers continued direct heals, triggering raid wipes via Corrupted Healing.	IMMEDIATE OMS ALERT Plays "Beware", shows personal <code>WarningSign</code> , posts raid chat message, and launches 30s <code><Class> Class Call</code> bar immediately on first yell.
Dual Class Call (e.g., Priest + Druid @ 22:20:42, Warrior + Warlock @ 22:10:10)	RACE CONDITION Class A was delayed until Class B arrived. If Class B packet was throttled or dropped over addon comms, both calls were completely lost.	SEAMLESS UPGRADE Class A fires instantly. When Class B arrives within 4s, active timer bar seamlessly upgrades to <code><Class 1> & <Class 2> Class Call</code> for remaining duration.
Network Comm Throttling (2 yells occurring within 0.2s)	PACKET COLLISION BigWigs <code>Comm.lua</code> throttled by root token. Second yell was dropped by the addon comm throttle.	PER-CLASS COMM TOKENS 9 independent sync channels (<code>NefCall<Class>30141</code>). Class 1 and Class 2 never collide or throttle each other.

2. Class-Specific Tactical Directives for the Raid

PRIESTS — Corrupted Healing (CRITICAL)

Direct heals apply a massive stacking Shadow DoT to the target instead of healing.

- Authorized Spells:** `Renew` and `Power Word: Shield` ONLY!
- Forbidden Spells:** Cancel any in-flight Flash Heal or Greater Heal immediately.
- BigWigs Alert:** Loud "Beware" horn + flashing `Renew` icon + "YOUR CLASS CALL".

WARRIORS — Berserker Stance Lock

All warriors forced into Berserker Stance, taking +20% increased damage.

- Tank Action:** Main Tank takes 20% more damage. Prepare defensive cooldowns (Shield Wall, Last Stand).
- Healer Action:** Pre-shield MT and maintain maximum HoT coverage.
- BigWigs Alert:** Automatic stance alert + Berserker icon warning.

DRUIDS — Cat Form Lock

Druids afflicted by `Involuntary Transformation`, locked in Cat Form for 30s.

- Resto Druids cannot heal. Feral tanks lose Bear armor/health pool.
- DPS cats must watch threat closely to avoid pulling Nefarian.

SHAMANS — Corrupted Totems

Shamans drop hostile Corrupted Stoneskin and Healing Stream Totems.

- Hostile totems grant huge buffs/heals to Nefarian and Bone Constructs.
- Action:** Melee and hunters must tab-target and kill all Corrupted Totems.

3. Blackwing Lair & TMH Engine Calibrations in BigWigs 30141

In addition to the Nefarian Class Call overhaul, BigWigs 30141 includes extensive calibrations grounded in real raid telemetry:

Boss Encounter	Mechanic & Calibrated Timing	Raid Advantage
Nefarian <i>Bellowing Roar (Fear)</i>	Calibrated <code>fearCd = 26.5s</code> (Pre-warning at 23.0s; empirical average 28.2s in 9/4 log)	Eliminates Golden 30140's premature 23.5s bar. Tanks will no longer waste Berserker Rage 3–6 seconds too early.
Broodlord Lashlayer <i>Mortal Strike & Bleed</i>	Calibrated <code>msFirstCd = 30s</code> Added Serrated Wound bleed duration alert.	Healers receive accurate MS cooldown timers and debuff expiration warnings on tanks.
Razorgore the Untamed <i>Phase 1 Egg Counter</i>	Calibrated <code>eggsTotal = 20</code> (Turtle WoW 1.18.1 standard)	Egg counter reaches 100% completion at 20 eggs instead of stalling at 20/30.
Ezzel Darkbrewer <i>New BWL Alchemist Boss</i>	Ton'Raka Charge Raid Marking (Triangle) Pillar collision DR cancellation & dynamic 1.6x Curse of Tongues cast scaling (12.8s wipe bar).	Charged players automatically marked and warned to bait boss into pillars; wipe cast accurately timed with CoT.
Selenaxx Foulheart <i>Timbermaw Hold (TMH)</i>	Rain of Destruction "MOVE" Warning Real-time tick warnings and enrage countdowns.	Prevents avoidable raid fire damage in Timbermaw Hold trash and boss encounters.

4. Raid Leader Action Checklist (Pre-Raid Briefing)

Mandatory Pre-Raid Verification Steps:

1. **Enforce Raid Addon Updates:**
Ask all raiders to ensure they have updated to **BigWigs Revision 30141 (Master commit `3e1a711`)**.
To audit the raid in-game, type:
`/bw version` or `/bw versionquery`
Raiders on older revisions (30140 or earlier 30141 commits) will show in red/yellow and should update immediately to share the new per-class comm channels.
2. **Priest Healer Profile Optimization:**
Priest healers should execute the built-in profile command for optimized bar positioning and emphasis:
`/bw priest`
This arranges Class Call, Corrupted Healing, and Mind Control bars directly in primary healer eye-line.
3. **In-Game Dry Run Test:**
The Raid Leader or any officer can test the full Nefarian encounter flow (all 3 phases, single class call, and dual class call transition) by running:
`/run BigWigs:GetModule("Nefarian"):Test()`
This executes a 40-second simulation displaying all timers, warning signs, audio cues, and bar transitions without engaging the actual boss.
4. **Passive Backup Assurance:**
Even if a raider has monster yell chat muted or is out of yell range, BigWigs 30141 now actively inspects combat log debuffs (`Involuntary Transformation`, `Corrupted Healing`, `Berserk`). The class call will trigger automatically on the first tick!
